PROFESSIONAL EXPERIENCE

FxBytes Technologies Pvt. Ltd.

Indore, India

Software Developer

July 2023 - Present

GB Marketing – AI-Driven Ad Campaign & Ad Creations

CENTRAL ENHANCEMENTS

- Created a full-fledged marketing platform to manage and automate ad campaigns across major platforms like Google, YouTube, Twitter, Facebook, and TikTok.
- Collaborated with Creatify AI APIs to build a Virtual Influencer Generator, allowing users to customize an AI influencer's appearance and script, which is rendered into promotional videos for multi-platform reel posting.

MICROSERVICE OPTIMIZATION

- Led the development in Nest JS and Python, connecting eight microservices. API Gateway, Ad Management, Authentication, Social Media Auth, Messaging, Notification, Shared Entities, and User Management, ensuring modularity and scalability.

AI CONTENT LISTINGS

- Personalized Content Creation: Automatically generate tailored images, videos, and ad copy using admin input, user behavior, and emotional insights.
- Platform-Specific Optimization: Dynamically adapt content format and style to meet the unique guidelines and best practices of each advertising platform.

GENERIC RESTAPI TESTING

- Migrated secure social media integration and ad publishing via OAuth flows and social media APIs. Designed and maintained scalable microservice interactions using event-driven communication and REST APIs, achieving a 70% reduction in response time and 10% lower memory usage.
- Improved test accuracy by 25% and enhanced efficiency by leveraging live requests for more reliable validation.

POSTGRESQL TO TYPEORM MIGRATION

- Migrating PostgreSQL database is shared among all microservices. Each service has its own set of tables within the database.
- Improved ensures consistency and allows services to manage their data within the same databases validating data integrity and optimizing query performance.

Chatbot for RAG on PostgreSQL – LLM-Powered Conversational Data Search

RAG FLOW INTEGRATION

- Integrated advanced RAG pipelines using PostgreSQL hybrid search and OpenAI-powered LLMs to enable natural language querying over structured datasets.
- Implemented LLM-based query rewriting via function calling to enhance search precision and support dynamic filter extraction.

INTELLIGENT QUERY PIPELINE

- Retrieval-Augmented Generation (RAG) application utilizing PostgreSQL as a structured vector store with hybrid search (full-text + vector). Enabled natural language Q&A workflows on enterprise-scale tabular data using OpenAI and local LLMs.

LLM-ASSISTED QUERY REWRITING

- Implemented OpenAI function calling to perform dynamic query rewrites and extract structured filters.
- Leveraged prompt engineering and a few-shot examples to align rewritten queries with domain-specific logic.

DATABASE & EMBEDDING LAYER OPTIMIZATION

- Collaborated with Built CLI tools to embed custom seed data and upload it into PostgreSQL.
- Improved consistency between data schema, embeddings, and full-text indexing.

QuickBooks Integration – Financial Data Sync & API Development

CORE ACCOUNTING API INTEGRATION

- Created robust REST APIs to integrate QuickBooks Online with core financial modules: Payments, Items, Accounts, Invoices, Customers, and Credits.
- Improved secure OAuth2-based authentication and token refresh flows to maintain persistent connectivity with QuickBooks APIs.

DATA FLOW AUTOMATION & SYNC

- Automated two-way data sync between internal systems and QuickBooks, reducing manual bookkeeping effort by 80%.
- Standardized API responses and error handling to align with QuickBooks schemas and ensure reliable transaction logging.

ACADEMIC QUALIFICATION

Shri Gujarati Samaj College

Bachelor's in Computer Applications

Indore, India

August. 2019 - June 2022

TECHNICAL SKILLS

Expertise

- Python, FastAPI, Django
- Nest JS, Power BI
- MySQL, PostgreSQL
- Pandas, NumPy

Skills

- Data Analysis
- AI prompting
- Machine Learning

ACHIEVEMENTS

- Full Stack Web Development- Python, Universal Informatics
- Data Analytics Internships, Volcanos
- Data Analysis with Python, Lets Upgrade
- Microsoft Azure Architect
